Welcome to Centric's new product guide, offering you our exciting range of products.

We are proud to showcase our extensive collection of products from many of the country's leading furniture manufacturers, the extensive portfolio of desking, seating, storage, screens and leisure products are chosen for their design, quality, functionality - and outstanding value for money.

DESIGN, Centric specialise in office design, bringing together interior and workplace design to create efficient, imaginative, offices that capture the spirit of your business.

PLANNING AND INSTALLATION, all installations are undertaken by trained staff and at times to suit you, all packaging is removed for recycling.

TRAINING, we can provide on site ergonomic training to make sure users are familiar with our products ensuring correct seating and posture.

CENTRIC TASK CHAIRS

The CEN101-202 chairs are a popular choice as the classic entry level task chair, proven through their quality, durability and comprehensive range of variations and options.

CEN101-202 are available with two different mechanisms, including a permanent contact back (PCB) and an independent seat and back mechanism (ISB). CEN101-202 features two back size options, height adjustable or fixed arms. The CEN101-202 ranges include a draughtsmans chair.

A new addition is the CEN101 mesh - the essential task chair fitted with an eye-catching mesh back. The mesh back is ergonomically shaped, height adjustable and available in six different colours.

The CEN101 MESH can be specified with a PCB or ISB mechanism. Options such as the polished aluminium base give chair the appearance and feel of a top of the range chair.

FREEFLEX

The Freeflex task chair designed by Justus Kolberg provides a clever and adaptable chair solution to support users movements in their working environment.

Innovation and user insights have come together to create a chair which not only looks stylish but pushes ergonomic boundaries.

FLX740HA

With height adjustable arms

OSCAR

Everything has been considered in the design and production of Oscar - user requirements, materials, styling, sustainability and end-of-life recycling.

Considerable attention to detail has been spent on ergonomics; lumbar and pelvic support as well as ease of use and comfort. By focussing on these features, it has removed the need for 'tank-like' assemblies under the seat, keeping lines clean, simple and flowing.

Frame colours Black, Grey & White.

Mesh Colours Yellow, Blue, Orange, Black, Dark or Light Grey

OSCAR

With height adjustable arms

Orthopaedica

CEN 9000

Designed to provide the user with the ultimate level of postural support with sculptured seat and back cushions, makes it an ideal choice for those with back problems.

The fit of the chair can be enhanced by additional options including seat depth adjustment, inflatable lumbar, inflatable thorax and a choice of arms with height adjustable as standard although a multifunctional arm pad may be fitted.

For the ultimate postural support a coccyx cut out has been incorporated into the seat design. Possibly the most unique addition is the AirTech seat board, a body responsive seat support that moulds and adapts to your every movement.

Every individual is unique in their proportions, which is why we developed a range of back heights within the Orthopaedica range. The mid back variation is built with a laminated core; the 9000 Series is available with an upholstered outer and inner back.

CEN9000

Complete with fold down arms, Airtech seat, inflatable lumbar, seat slide with synchro mechanism.

CEN 9500

The expansion of the Orthopaedica range has led to the creation of the Ultra high back, to offer the user the ultimate in support and comfort. Developed with a laminated core structure for additional strength, the 9500 Series features a fully upholstered back.

CEN9500

Complete with fold down arms, Airtech seat, inflatable lumbar, seat slide with synchro mechanism and inflatable thorax.

INFLATABLE LUMBAR & THORAX

By using the pneumatic pump, the lumbar or thorax can be inflated or deflated as required to meet individual user requirement

AIRTECH SEAT BOARD

A push of the button allows air to flow through the two way valve; this enables the seat to move as you move and moulds to your natural shape

TEN
YEAR
WARRANTY

At Humanscale, we believe that the highest level of functionality is achieved through simplicity. With our chairs, we replace heavy, complex mechanisms with the sitter's own body weight and the laws of physics to encourage movement, providing the most comfortable chair available.

FREEDOM HEADREST

Designed by Niels Diffrient
Described by The New York Times as "the gold standard in office seating", the Freedom chair redefines the concept of traditional task chairs. Designer Niels Diffrient aimed to design an office chair that automatically adapts to the user, allowing them to move freely from posture to posture.

FREEDOM

Diffrient's unique approach removed complexities found in other chairs, such as cumbersome recline levers and back tension dials for a truly ergonomic task chair. As a result, he developed a recline mechanism that perfectly adjusts to the user, definitively reinventing modern task seating to be truly simple, functional, and beautiful.

WATCH THE
VIDEO

Our longstanding partnership with legendary designer Niels Diffrient produced our award-winning Freedom, Diffrient World, and Liberty chairs. We also collaborate with respected industrial designers such as Don Chadwick and Todd Bracher on new seating products.

DIFFRIENT WORLD

Designed by Niels Diffrient

Diffrient World is Humanscale's first foray into all-mesh task seating. Designer Niels Diffrient wanted to create the most minimal, full-function task chair ever made. With an innovative tri-panel mesh backrest that provides custom back and lumbar support and a lightweight design, Diffrient World is, like all of Humanscale's products, simple, beautiful and functional. The design eliminates the need for traditional mechanisms, instead using the laws of physics and the sitter's body weight to offer perfect recline for each individual sitter. Diffrient World offers the ultimate user-friendly sitting experience

LIBERTY

Designed by Niels Diffrient

The Liberty Task chair is an intelligent mesh task chair engineered to provide automatic lumbar support for every user, as well offering simplicity and complete ease of use. Liberty was designed to offer a unique, minimal aesthetic and to provide custom comfort for every person who sits in it. Like Humanscale's Diffrient World chair, Liberty uses Humanscale's revolutionary Form-Sensing Mesh Technology and mechanism-free recline for perfect support and unprecedented comfort.

CEN 24/7

24 hour facilities where people work around the clock require the right equipment. It is important to have the best chair to ensure performance throughout the working day/night, when concentration is a must.

The 24/7 has been designed for constant use, to give high levels of comfort using moulded foam with a sturdy internal steel structure. Specify with fabrics that will cope with the demands of 24/7 environments.

The CEN 24/7 features a high performance fully adjustable mechanism providing easy adjustment and dynamic sitting to suit the 24/7 environment. The weight setting is up to 190kg/30 stone.

The Xtra high back version offers an integral neckrest that adjusts backwards and forwards to support the users neck and shoulders.

KAB

A 24 hour chair for primary use in surveillance and control stations. Also ideal for deluxe office environments. The standard version features a robust leather fabric combination, providing maximum durability and comfort for 24/7 usage.

KAB Controller features

- 200kg (31 stone) rated gas lift
- KAB Tilt System (allows for regular posture change)
- 24 hour use certified
- Inflatable lumbar pump for lower back support
- Seat height adjustment
- Height & weight adjustment

BESPOKE RECEPTION

Recent projects have included a 13-metre-long, free-standing cantilever counter top using a steel frame anchored to the floor for the University of Birmingham, a reception desk with built-in cash till drawers for a leisure centre in Wiltshire, and another reception desk for Lloyds Register in London.

The bespoke side of the business has really taken off. There's a growing appetite for individual design and items that create an instant impression and reinforce the personality of a business or workplace.

Items like reception desks are the most obvious place to do this and it's the most popular request, but we also create bespoke soft seating that makes the most of existing space.

17

17

We're finding that existing clients are coming back to us for more items too.

We believe that's because our bespoke products are engineered to a high standard - as well as the service and aftercare we can provide.

CHEMISTRY

Chemistry is a Modular Bench system ordered as a starter, or add on desk. It is available in a back to back or inline format with options for fixed or sliding tops, standard or 'O' legs.

The system can be fully cable managed and the inset mid-leg is manufactured to accommodate a vertical wire management cassette as an option.

The twin beam system on fixed tops and 'outriggers' on sliding tops add to the rigidity of this system. Height adjustable and height settable desks are included within the range as are screens and storage.

RISE Electric and Manual

- Height range 680 to 930mm.
- Manually adjustable using retractable handle.
- Available in rectangular & wave footprints.
- Accepts horizontal cable management.

From compact forms to larger spans, Rise can be used independently or positioned in clusters, giving both individuals or teams the ability to fine-tune their levels
Height range 635 to 1290mm. 2 year electrical motor warranty.

Switching between sitting and standing postures throughout the day can help reduce the physical stresses on your body, keep you active at work, and improve your productivity.

Research suggests that we should be standing for at least two hours, gradually increasing that up to four. With a standing desk you can make this change as simple as possible.

QUICKSTAND

FIVE YEAR WARRANTY

Active working is now an option for everyone. With Humanscale's easy-install QuickStand sit and stand workstation, any desk can easily function as an adjustable-height desk. The key to integrating movement into the work day is simplicity. QuickStand is not only easy to install but easy to use and comes with all you need to get moving right away.

- QSEWS** single monitor
- QSEWD** double monitor
- Laptop Tray**

FLOAT

Float is a height-adjustable sit-stand table that offers more height adjustability, a greater weight accommodation range, and more work surface options than any other counterbalance table.

All come with clean architectural lines that belie it's sophisticated functionality.

- 1600 x 600w
- 1600 x 800w
- 1800 x 800w

VERCO
Intuition

The Intuition desking range reflects the traditional Verco attention to quality and detail. Desk tops are 30mm thick with a reverse chamfer on all edges. Leg frames include height levellers and vertical wire tidying facilities as standard.

A choice of three veneers: Cherry, Maple and Walnut, highlighted with silver fittings, meets the demands of the modern marketplace.

Simplicity and functionality, with the elegant large sweeping work surfaces reflect the gracefulness of this distinctive range.

Tables, pedestals, cupboards and bookcases which suite with the desking, are all available with the same silver finishes to highlight the beauty of the real wood veneers

VERCO
Corniche

The Corniche desking range represents a commitment to providing a range of executive furniture with the highest achievable standards of elegance and quality. Desk tops are 40mm thick with solid wood lippings all round and with Bull nose profiles on the front and rear edges.

A choice of three veneers: Oak, Cherry and Maple and the additional ability to stain to sample ensures that Corniche will enhance any office environment.

High quality materials, craftsmanship and close attention to detail is typical of the range and is exemplified by the solid sculptured wooden pen tray which is available for all Corniche pedestals.

Conference tables and ends, mobile or desk height pedestals, cupboards and bookcases which suite with the desking, are available to meet all requirements.

Lockers that can stand up to heavy use whilst looking stylish - **SHOCKPROOF LOCKERS** fitted with 10mm Solid Grade Laminate doors. The solid grade laminate door material from Formica, Trespa, Arpa and Polyrey are designed to offer a strong and resilient door that can withstand knocks and scrapes that may leave other lockers with dents and scratches. Impact Resistant • Scratch Resistant • Graffiti Resistant • Wear Resistant • Moisture Resistant • Easy Clean

Our range of high quality powder coated steel lockers achieve the rare distinction of being tested as non-combustible and approved in line with the European Standard - EN 13501-1: 2007 +A1: 2009 relating to fire performance. These lockers will not combust, increase or sustain any fire within their proximity. Available in a wide range of door colour, door tier and lock options.

CIRCO

Circo is a functionally simple light work conference and task chair with a permanently floating action and a mesh back that morphs to support the user.

These features are equally welcome in conference and meeting room environments where conventional static seating may not provide adequate movement to promote healthy sitting.

CR4
Conference chair, dynamic
yoke with glides

CR2

PRICED IN BAND 1 FABRIC

AD-LIB

The role of multi-purpose seating has become increasingly important. Ad-Lib has been designed to provide diversity of scope, without compromising cost, performance or build.

Its modular single-core structure centres upon a frame that accommodates different panels as seating surfaces. These optimise both seating comfort and build for each need and environment.

The core frame supports six different structures, which can be fitted with or without arms.

AD-LIB TABLES

The Ad-lib programme designed by PearsonLloyd has been developed principally to work with the Ad-Lib seating range - and shares common design values and architecture.

Similar goals of lean material usage and sustainability were key to its development, as was the desire to develop a truly universal table programme with a very small inventory of components.

PRIME TABLES

PRIME is the ultimate expression of Boardroom luxury. Dynamic, user friendly and finished to market leading standards, the PRIME system is sure to become the stunning centre piece of any boardroom and conference room environment it occupies.

Able to be specified in an infinite number of styles and finish options, from contemporary to classic, PRIME is the most advanced, fully defined flexible boardroom system. Cleverly engineered to be efficient and robust with market leading flexibility.

WILLIAM HANDS
BRITISH FURNITURE MAKERS

ORION SOFT OVERSTITCH

All Orion Soft Overstitch Executive swivel and cantilever chairs are supplied with an additional overstitch detail to the perimeter of each individual soft support pad and seat surround. Chrome arms and upholstered arm pads come as standard.

Please contact us for bespoke prices

INFINITY TABLES

INFINITY has been specifically designed to be the most complete and fully integrated meeting, conference and boardroom table system we have ever produced. With a feeling of superior quality evident on every surface, edge and user feature, each piece exudes an aura of professionalism and a vision of success.

PRECEPT SWIVEL & CANTILEVER

Cool, crisp and contemporary, it is practical and equally as comfortable as a work chair at a desk or at a meeting table. The swivel models have either an easily adjustable height and lockable tilt mechanism or a memory return mechanism for use in boardroom settings.

Please contact us for bespoke prices

TRANSCEND TABLES

Our most versatile and extensive conference and meeting platform. Clean lines and a timeless aesthetic embody the design philosophy. Cleverly engineered to be efficient and robust with market leading flexibility. These unique qualities mean the range can be universally specified enhancing any meeting, conference and boardroom environment. Beautifully finished top surfaces, hand-crafted from the finest, sustainable natural veneers and solid timbers all elevated by an elegant chrome riser.

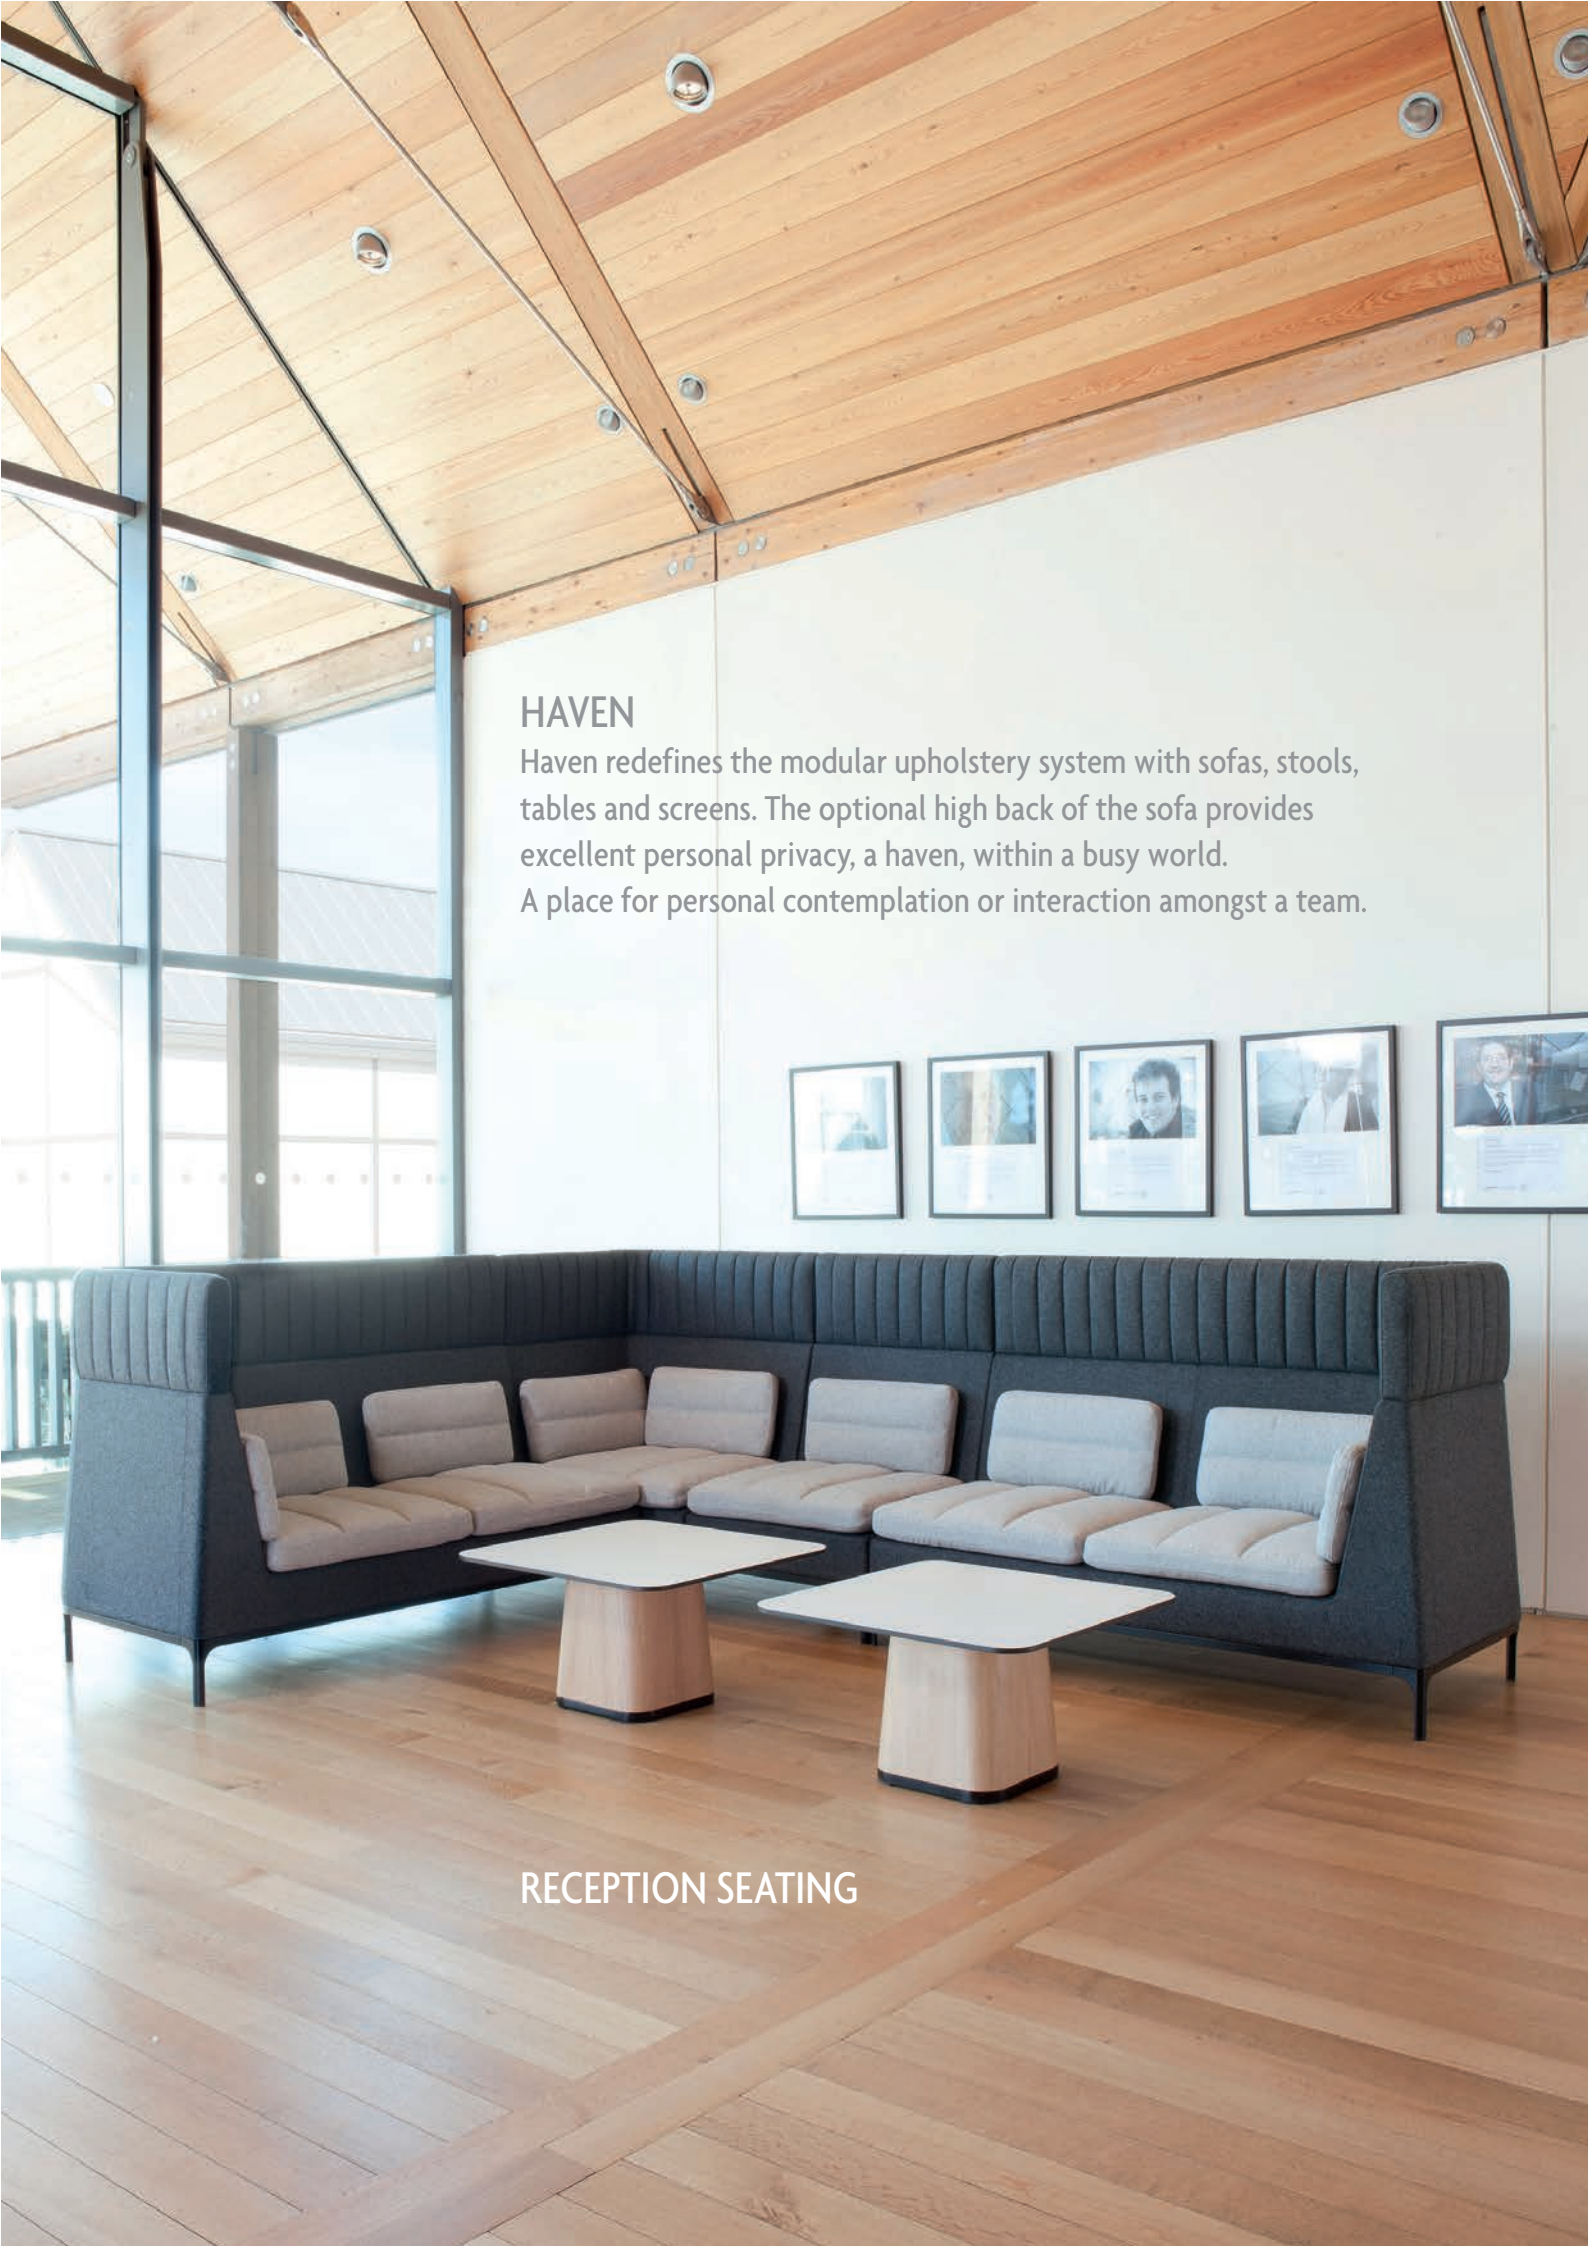

HAVEN

Haven redefines the modular upholstery system with sofas, stools, tables and screens. The optional high back of the sofa provides excellent personal privacy, a haven, within a busy world.

A place for personal contemplation or interaction amongst a team.

WOOD GRAIN BOARD FINISHES

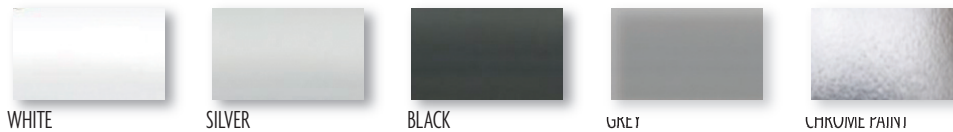

Superior high impact resistant edging is used on all our board finishes in preference to the less environmentally friendly Polyvinyl Chloride (PVC). Apple, Ash and Light Oak 36mm edging is not available.

SCRIPT - ACCENT COLOURS FOR DOORS & DRAWER FRONTS

METAL FINISHES

Why Chrome paint? Due to the impact of the toxic chemicals used in chrome our chrome paint offers a similar look without treatment to dispose of the waste.

SIERRA VINYL

SIERRA FEATURES • Medium hazard - suitable for a wide range of heavy duty applications including medical • Base colour used throughout the coating process so scuff marks are almost invisible • Sierra+ contract vinyls are easy to use, easy to clean and are available in a wide variety of colours. Sierra+ now has antimicrobial and antibacterial protection that resists gram negative and gram positive bacteria (including MRSA), filamentous fungi and yeast.

A key characteristic of vinly surfaces as opposed to most surfaces, is that they are hydrophobic. They do not absorb water, they do not retain dampness and they can be completely dried after washing. Research has confirmed that the viability of MRSA bacteria is greatly reduced in dry environments.
